The pation has been borrified at the burn

This event carried terror because it was sudden and appalling; but had the same disastrous results to life and had the same disastrous results to life and limb come silently they would have been unnoticed, not only by the people of the land but also by the very community in which they occurred. Fatal events of a far worse nature have taken place in this very city, but they have attracted no attention, nor would they now did not the Bureau of Vital Statistics bring them to our notice. 'Figures do not lie,' whatever else may be uncertain. do not lie,' whatever else may be uncertain, and the report on the deaths of this city is a startling comment on its life. During the past year the enormous increase of certain maladies is simply appalling. While the total number of deaths has diminished, and the death rate on most diseases has decreased, still it is far greater in one or two serious dis orders than was ever known before. All parties in this hasty union were rewarded by large fees. When the time came for departure for the ball, Lord Cantyre and wife refused to accompany the party, making some slight excuse for thus changing their minds. The next day the whole party returned to Perth, his Lordship engaging a parlor car especially for their comfort. He left no debts behind, being well prepared, apparently, to carry out his scheme successfully. On returning to Perth, something came out which aroused suspicion of the fel-low's representations, and application was countryman and fellow peer. The announcement came immediately that no such title was known to the British peerage as Cantyre, and the party must be a swindler and a rogue. It is with a good deal of reluctance that I make any public expression on this question at this particular time. I will not say it is with diffidence, for I never fear to speak my mind on anything I claim to understand, should occasion demand. SAN FRANCISCO, February 22d.—Mayor Sartlett has received from the Secretary of State at Washington a communication relating to the death of E. V. Sutter at Ostend, Belgium, July 3, 1881. The deceased was the son of General John Sutter, at whose mill at Coloma gold was first discovered. The Secretary of State inclosed a photograph of the deceased, and letters showing that he had arrived at Ostend from Havre July 1, 1881, and had taken a room at Hotel Bellevue, He appeared to be out of his mind at times, and cried for assistance. July 31 he went to bed, saying that he would depart for London the many of the actresses who have been here as stars, and Madame Ellmenreich is fortunate in having such able support. Joseph R. Grismer made a good Sir Edward Mortimer, and E. N. Thayer an excellent Lord Shrewsbury. The latter is a most reliable stock actor, and fills whatever part is allotted to him in a faithful manner. W. C. Deal is rapidly rising in his profession, and bids fair at some future day to gain more than a State reputation. This evening will be presented, for the first time in Sacramento, the emotional drama of "Adrienne Lecouvreur," which is said to be Madame Ellmenraich's masterpiece. It was in this character that she made her greatest success in San Fransche made her greatest success in San Fransch entries to a start two shades and she made her greatest success in San Fransch entries to a state in view there invited to attend. And be it remembered that all municipal corporations are in the nature of an unlimited copartnership, so that those who own the most owe the most, and it becomes them to look well into these things. At this meeting, besides what are known as business men, there were a number of able lawyers, as also the manager of the Recorpt Union and the senior proprietor of the Bee. The law of 1858, under which these bonds were issued, the charter of 1863 and all of its subsequent amendments were fully discussed, sequent amendments were fully discussed. Merits of Barbed Fence: It is the cheapest fence made; the most durable; it is not affected by fire, wind or flood; does not cause snow-drifts; takes fewer sence posts; stock cannot push it down; it protects itself—acts on the defensive; it takes but little room; you can cultivate close to it; weeds are easily kept from it; requires but little labor to put it up; you can draw enough at one lead to fence a farm; you can fence a good-sized farm in a day; it is the greatest practical invention of the age; and has come to be the farm and railroad fence of the country.

We advise every one who wishes to purchase wire, and wants the best, to buy the CACTUS BARB, as it contains all the favorable features that are required, and none of the objectionable ones. It is made only from the best annealed steel, fully warranted, either galvanized or painted; put up in spools of from 100 to 120 pounds each. Remember, it will not exceed 17 ounces per rod.

MEDICAL.

DENVER, Col., Aug. 29, 1882.

GENTS: I cannot find words with which to express my gratitude to you for the cure Swift's Specific has effected in my case. I was afflicted with the horrible blood disease for three years, and after spending some time at the Hot Springs, considered my case a hopoless one. I used only one dozen small bottles of S. S. S., and there is not a sign of the disease remaining. My sores are all healed, my throat is entirely well; I am

clerk, I have seen so many hundreds of men dosed with Calomel, Iodide of Mercury and Iodide of Potash, until they were made complete wrecks, that I shudder to think of the misery which has been brought on the human family by the use of Mercurials for Blood Diseases. It is a crying shame that physicians will not acknowledge the merit of your GRAND Blood Medicine. Use my name as you wish. J. H. RAIF, Broadway Pharmacy, Denver, Col.

MIDDLE-AGED MEN.

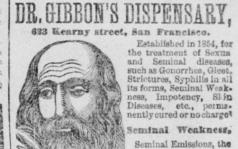

There are many at the age of thirty to sixty who are troubled with too frequent evacuation of the bladder, often accompanied by a slight smarting nurning sensation, and a weakening of the system in a manner the patient cannot account for. On examining the urinary deposits a ropy sediment will often be found, and sometimes small particles of albumen will appear, or the color will be of a thin milkish hue, again changing to a dark and torpid appearance. There are many men who die of this difficulty, ignorant of the cause, which is the second stage of seminal weakness. Dr. S. will guarantee a perfect cure in all such cases, and a healthy restoration of the genito-urinary organs.
